The Rapture

By Michael Aro

The author of “M ” and “Red Moon”

It's the end of the world, the apocalypse has come. The Rapture is Michael Aro's dark, satirical view of the end of the world. Terminus Est Near, the end is near and our world is bleak. Aro shows us what happens when apocalyptic events start to shape our future. When faith and religion collide with fear and panic for that's when we truly see who we are and it only happens in the end times. It's an epic book and breath taking until the last page. The Rapture is Michael dark poignant novel of the end times without the religious rhetoric of apocalyptic novels, but still leaving us with one question – what will we do when the end is near. It's a must read for any Michael Aro fan.
